FIRST GEAR.

March 7, 1916 is recognized as the official founding date of Bayerische Motoren Werke (BMW). The 1928 BMW Dixie 3/15 PS DA, with its all-steel construction, was the first BMW to officially be offered to the public.

1916

SIX AND A DOUBLE GRILLE.

The first BMW to incorporate a six-cylinder engine and the trademark double kidney grille is the 1933 BMW 303. It is considered to be the prototype for all subsequent BMW automobile designs.

1933

SPEED RACER.

The iconic BMW 328 premiered competitively at the Nürburgring racetrack in Germany in 1936. By 1940, it had participated in 172 national and international races, achieving 141 victories in the process.

1936

THE “BAROQUE ANGEL.”

The BMW 501 was the company’s first post-war model. Although not a commercial success, its luxurious quality quickly restored BMW’s status as a premium auto manufacturer.

1951

“BUBBLE CAR” BOOM.

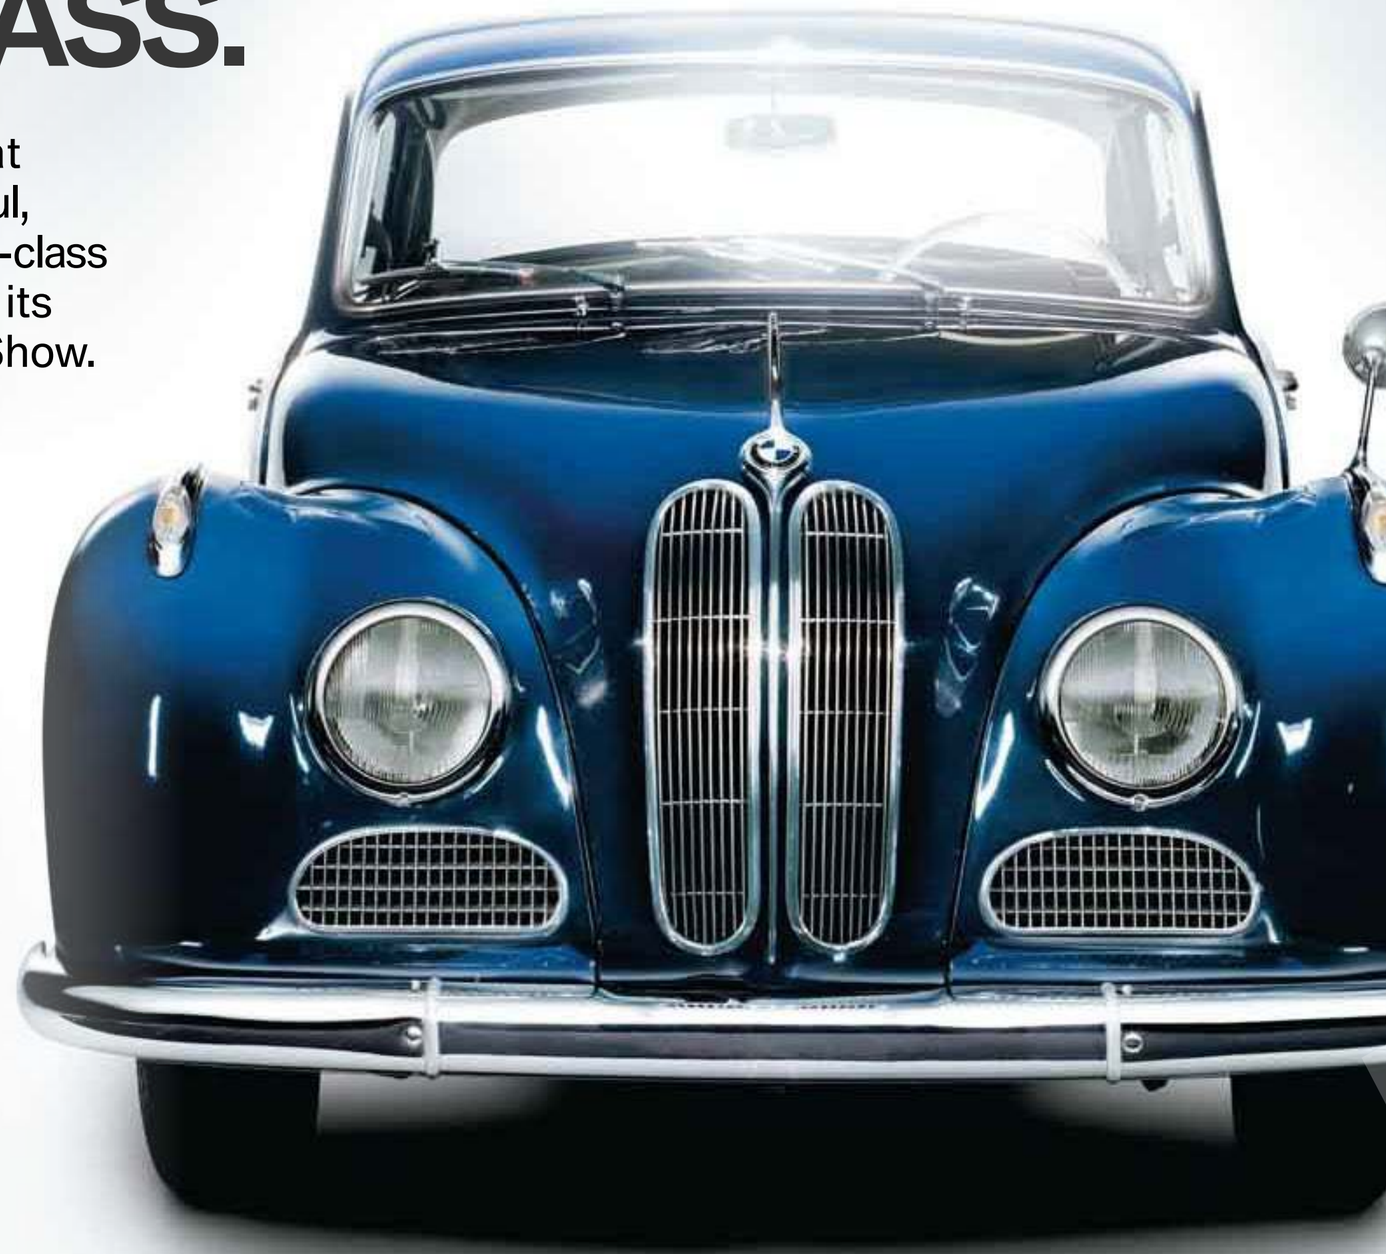

Nicknamed the “Bubble Car” because of its egg-shaped exterior, the BMW Isetta captured the hearts of the public. Over 160,000 Isettas were purchased in the Fifties, making it the best-selling BMW of that decade.

1955

THE NEW CLASS.

The BMW 1500 was the model that re-established BMW as a successful, modern automaker. The sporty, middle-class sedan became an immediate hit after its introduction at the Frankfurt Motor Show.

1961

MAGNIFICENT SEVEN.

When the BMW 7 Series was launched, it was considered to be state-of-the-art technology. Each successive generation has interpreted the ethos of this iconic luxury sedan anew.

1977

European model shown.

M. PERIOD.

Initially envisioned for the racetrack, the revolutionary M1 delivered a pulse-pounding 277 hp with 243 lb-ft of torque, could reach top speeds of 162 mph and redefined the era's supercar category.

1978

MEGAWATTAGE.

The ultimate “green machine,” the BMW i8 has been revolutionizing its vehicle class ever since its introduction. A tour de force of sustainable mobility, it is the rarest of all hybrids: a plug-in with the sleek lines and performance of a true sports car, yet delivers the low consumption and emissions of a compact.

2013

DRIVING FORCE.

Award-winning BMW TwinPower Turbo gasoline and diesel engines, including the M Performance TwinPower Turbo V-12 engine, are the heart and soul of all BMWs. They combine the latest injection systems, fully variable performance control, and innovative turbo technology – setting the brand far apart from the competition.

GRIPPING POWER.

BMW xDrive intelligent all-wheel drive optimizes traction and enhances agility and stability on all types of road surfaces – even in tight curves. Utilizing sensors that measure wheel speed, steering angle and traction, xDrive seamlesly distributes power between the front and rear axles. This allows each BMW to maintain its natural handling abilities in dry conditions, while self-adjusting when any loss of traction occurs or driving conditions change.

INNOVATION REDLINED.

When it comes to game-changing innovation, BMW has always been ahead of the curve. The sophisticated features you'll find in our models today are paving the way for the autonomous driving technology of tomorrow.

[2] Driving over rough or damaged road surfaces, as well as debris, curbs and other obstacles, can cause serious damage to wheels, tires and suspension parts. This is more likely to occur with low-profile tires, which provide less cushioning between the wheel and the road. [1] Run-flat tires do not come equipped with a spare wheel and tire.

[2] Driving over rough or damaged road surfaces, as well as debris, curbs and other obstacles, can cause serious damage to wheels, tires and suspension parts. This is more likely to occur with low-profile tires, which provide less cushioning between the wheel and the road. Be careful to avoid road hazards and reduce your speed, especially if your vehicle is equipped with low-profile tires.

[1] Driving over rough or damaged road surfaces, as well as debris, curbs and other obstacles, can cause serious damage to wheels, tires and suspension parts. This is more likely to occur with low-profile tires, which provide less cushioning between the wheel and the road. Be careful to avoid road hazards and reduce your speed, especially if your vehicle is equipped with low-profile tires.

[2] Performance tires are not recommended for driving in ice and snow conditions.

[3] Run-flat tires do not come equipped with a spare wheel and tire.

An aggressive front end with Adaptive Full LED Headlights, frameless side windows and a glass hatch fully incorporated into the fastback design means only you will know about the benefits of its added utility.

INTERIOR MASTERPIECE.

Inside the beautifully appointed cabin you'll enjoy exclusive features, such as blue ALPINA instrumentation, the ALPINA steering wheel in hand-stitched LAVALINA Leather, ALPINA luxury trims, a strikingly modern console and, of course, state-of-the-art BMW technology.

JAWS, PREPARE TO DROP.

The potent beauty of the exterior is impressive enough, but there’s nothing like the robust roar that emits from the ALPINA Bi-Turbo engine when you start it up.

AERODYNAMIC EXCELLENCE.

No wonder it’s the rarest prize on the road. The aggressive front facia with integrated lip spoiler sweeps back to the elliptical twin tailpipes and creates a sleek, modern profile that reflects the B6’s astonishing performance. Iconic 20-spoke ALPINA light-alloy wheels add to the dynamic look.

HIGH-CALIBER PERFORMANCE.

THE FIRST-EVER BMW i8 ROADSTER AND THE NEW BMW i8 COUPE.

The first-ever BMW i8 Roadster and the new BMW i8 Coupe are pioneers of innovation – notable for striking looks, exhilarating performance, lightweight construction, systematic improvement of aerodynamics and advanced plug-in hybrid technology. The electric motor and combustion engine combine to provide an impressive total output of 369 hp and 420 lb-ft of torque. And both the BMW i8 Roadster and the BMW i8 Coupe are marvels of design, with the Roadster offering the freedom of open-top motoring, and the Coupe defining itself as an extremely sporty 2+2 seater. Marked by their sculpted frames and dynamic proportions, these objects of desire are true icons of sustainability.

AN ELECTRIFYING DRIVE.

With its hybrid-specific combustion engine driving the rear wheels and electric motor driving the front, the new BMW i8 Coupe accelerates from 0 – 60 mph in just 4.2 seconds. Powered by BMW eDrive technology, the sleek 2+2 seater can cover up to 18 miles in purely electric driving. Matching its outstanding performance as a hybrid sports car is the head-turning design—including a low hood, short overhangs, long wheelbase, elongated roofline, scissor doors and Coupe badging on its B-pillars.

BMW MOTORSPORT

FROM THE TRACK

More than 40 years, thousands of races, and an overflowing trophy case – that's one legacy of BMW Motorsport in North America. We love winning. But what we cherish even more is bringing countless racing-winning ideas and innovations to each and every BMW we build. Including yours.

BMW MOTORSPORT.

BMW Motorsport and BMW North America were born in 1975. In the more than four decades since, BMW GT, Touring, and Prototype racecars have won scores of races and championships in North America. This includes victories in some of the world's most grueling and iconic endurance races: the 12 Hours of Sebring and 24 Hours of Daytona.

BMW M6 GTLM AND BMW M6 GT3.

We kicked-off the celebrations of our 100th Anniversary in 2016 with the introduction of the BMW M6 GTLM. Powered by the same 4.4-liter Twin Tower Turbo V8 found in the BMW M6 road car, the BMW M6 GTLM enters in 2017 its second racing season in the IMSA GT Le Mans class. Its stablemate, the BMW M6 GT3, was also introduced in 2016. It is available to North American customer race teams and currently also competes in the IMSA Championship, in the GT Daytona class.

CUSTOMER CARS.

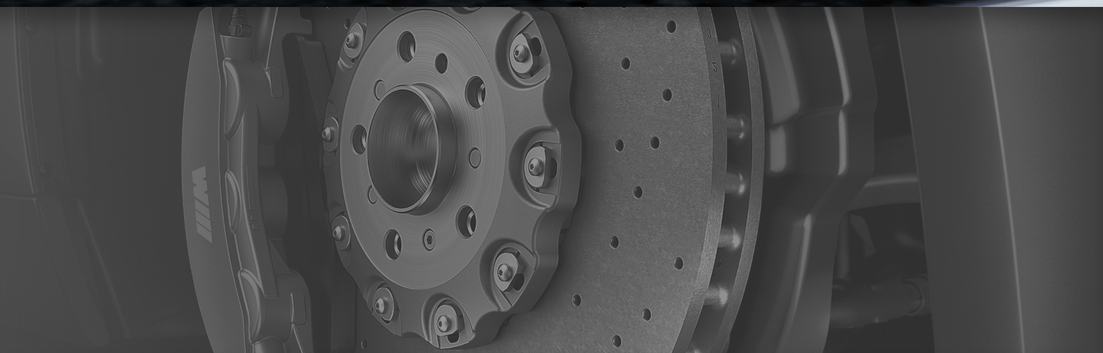

BMW customers are competing across America with racecars designed and built by BMW Motorsport and they are winning. For instance, 2016 saw the #26 BMW M235i Racing of Classic BMW Motorsport triumph in its first year in the ultra-competitive Pirelli World Challenge TC Class.
